PREFACE

Have you ever wondered how pricing for hot desks in your city compares to other flexible office spaces around the world? If you're looking to expand your coworking operations to a new location, which market would generate the greatest potential return?

As the coworking industry continues to adjust to new post-pandemic trends in remote working, analyzing global hot desk prices gives evidence to ongoing demand for available workspace. These average hot desk prices offer useful insights into the industry's development, such as the hot desk price world average and the world's most and least expensive markets.

This is our fourth annual Hot Desk Price Index Report, where we explore key data related to global hot desk (or open/flexible seating) prices on an international scale. The data is provided by Coworker and is representative of over 19,500+ coworking spaces in 172 countries.

The numbers are based on cities and countries with more than five coworking spaces (five hot desk prices) to ensure a large enough data set, which helps with comparison metrics; extreme outliers were also removed from the overall data set. Ultimately, this year's report offers a data-led view of the coworking industry's pricing on a global scale, including how top markets are pricing their hot desks to remain competitive and which markets are experiencing growth.

• THE COWORKING INSIGHTS TEAM

ABOUT COWORKING INSIGHTS

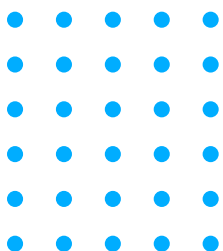

As part of The Instant Group, Coworking Insights is the leading source for data, advice, and trends in the coworking industry.

We are committed to sharing the latest data-led insights about the industry, along with relevant news stories and interviews from coworking space operators.

We aim to bring all of the people involved in the coworking industry – including managers, operators, providers, and members – closer together by giving them a common place to learn and share their insights and experiences.

KEY INSIGHTS

- 1 2022 global average monthly hot desk price - \$206 USD
- 2 Global annual change between 2021-2022 - +9%
- 3 Continent with the most expensive average monthly hot desk price - Oceania (\$285)
- 4 Country with the most expensive average monthly hot desk price - Switzerland (\$382)
- 5 City with the most expensive average monthly hot desk price - Zug, Switzerland (\$439)
- 6 All continents showed an increased YoY average monthly desk price except for North America, which decreased -1.2% (from \$249 in 2021 to \$246 in 2022)
- 7 For the first time in four years of our study, several Middle Eastern countries rose to the top of the list for most expensive cities, including Tel Aviv, Israel (\$314), Doha, Qatar (\$314), Jeddah, Saudi Arabia (\$348), and Riyadh, Saudi Arabia (\$319). This is indicative of the growing demand for coworking spaces in these regional economic centers.
- 8 This year, eight out of the top 10 cities with the highest average hot desk prices were in Switzerland, including Basel, Bern, Geneva, Lausanne, Lucerne, Winterthur, Zug, and Zurich. This is compared to 2020, when four out of the top 10 most expensive cities were in Switzerland, showing both the growth and competitive nature of the country's market for coworking.
- 9 Several cities have maintained a spot in the top 15 most expensive cities for coworking hot desks every year since 2019, including Three cities in California (Oakland, San Francisco, and Santa Monica) along with New York City.

SUMMARY

Our findings this year have led us to conclude that hot desk prices increased by 9% globally between 2021-2022, with global desk prices rising from **\$189 to \$206** per month.

We believe this increase was mainly driven by the consequences of Covid-19, which caused operators to restructure their business models in order to remain competitive and appeal to professionals working from home. For example, large networks (such as WeWork and Regus) introduced flat rate all-access passes to multiple locations, giving members even more options with regards to where they work. With widespread inflation putting upward pressure on global pricing, giving individuals more choice for their money was a necessary value add in a post-Covid environment.

From a continent perspective, every continent with the exception of North America showed an increased average monthly hot desk price. In North America, the average price decreased by -1.2% from \$249 to \$246. The global average in Asia increased most dramatically, rising by 11.7% from \$144 to \$163. In terms of country rankings, Switzerland claimed the top spot in 2022 for the most expensive monthly hot desk price, coming in at \$361 per month. Hong Kong ranked in second place at \$344 per month, and Qatar is third with \$314 per month. Worth noting is Qatar's jump from 24th in 2021 to 3rd in this year's rankings.

When comparing the world's most expensive cities for hot desks, Zug in Switzerland claimed the top spot, with monthly hot desk prices of \$439 on average. Santa Monica in California (which ranked first last year) came

in second place at \$431 per month, with Zurich claiming third place at \$428 per month.

Moreover, our city data showcases just how expensive the cost of living and real estate pricing is in places like Switzerland and California; eight out of the top 10 cities with the highest average desk prices were in Switzerland, including Basel, Bern, Geneva, Lausanne, Lucerne, Winterthur, Zug, and Zurich, while two out of the top 10 were in California, including Santa Monica and San Francisco.

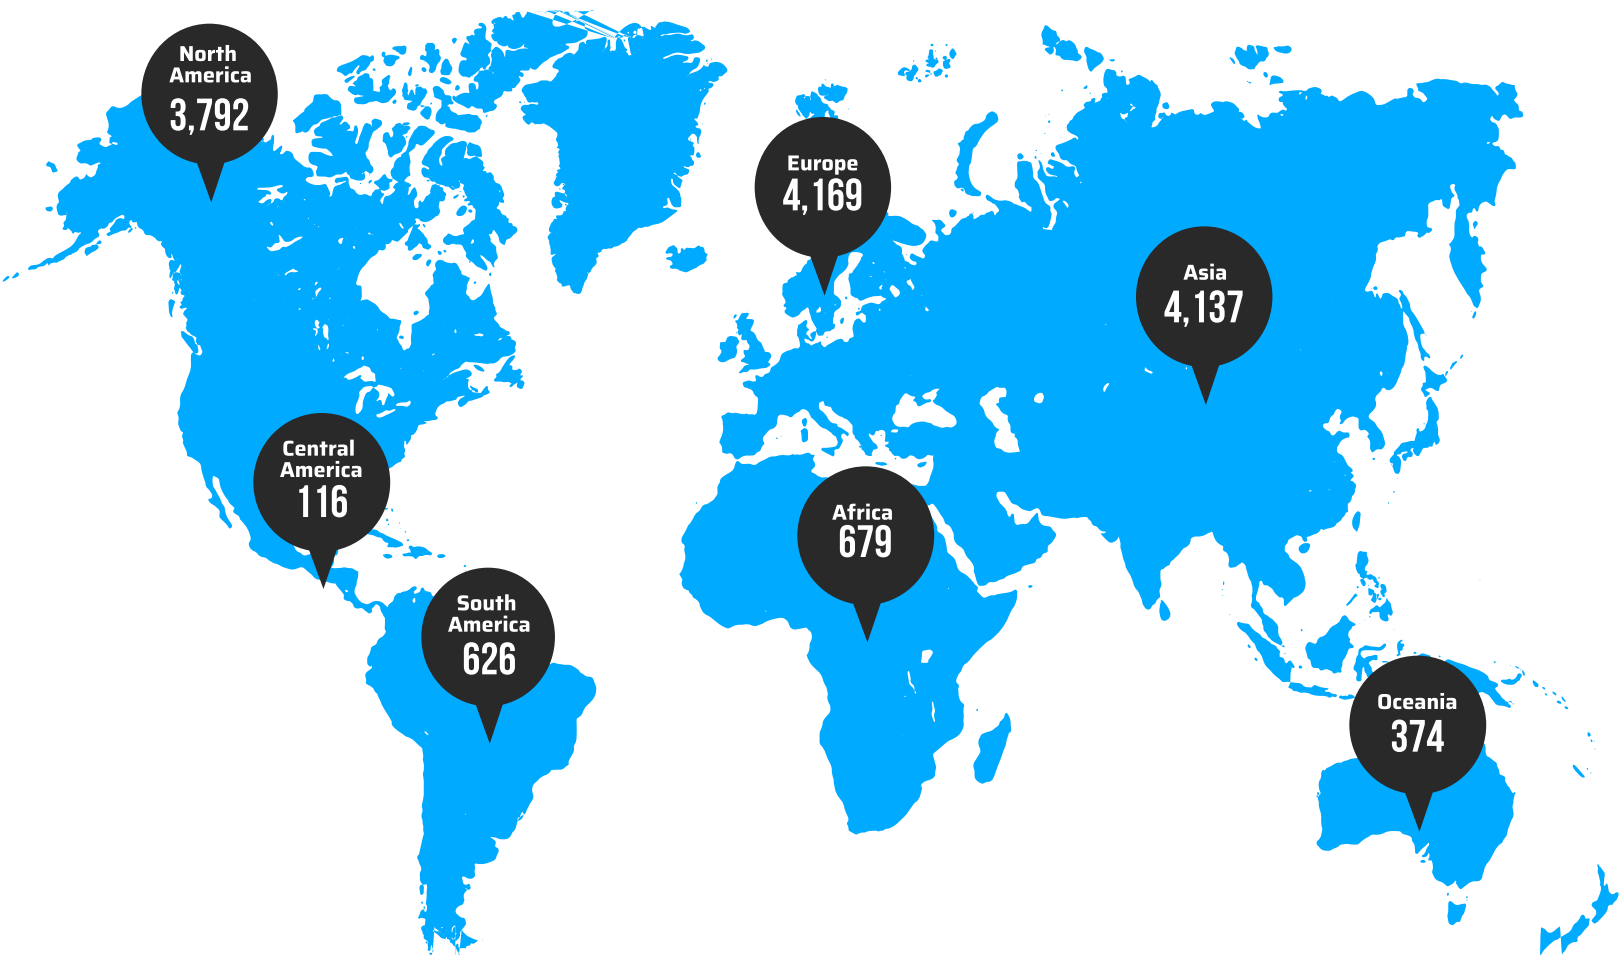

This year's data also illustrates an interesting trend with regards to space closures in the wake of Covid-19. Coworker's data between January 2021 and December 2021 shows that 811 coworking spaces permanently closed their doors to members; the average price of these closed spaces was \$172 per month (much lower than the global average of \$206). Removing these spaces from Coworker's database effectively increases the average price globally and fits the assumption that smaller, independent spaces with fewer resources were most vulnerable to the economic hardships of Covid-19. On the whole, the larger, better capitalized spaces were better positioned to remain operational during 2021 and often catered towards a higher-end demographic and had, on average, higher monthly desk costs.

Overall, our findings illustrate the expansion of available hot desks and wider distribution beyond capital markets, which ultimately led to an average price increase between 2021-2022. As always, thank you to Coworker for providing the data for this report!
